Q1)

Problem statement → There is an organization A with Multiple Departments. Design a Network for the HR department and the size of the department is 10 users. Also show the Communication b/w user Number 1 and user Number 5 of the network.

Objective description → From the question I have understood that, we have to create a LAN in a HR department.

→ Step 1) First we need to take 10 users (10 devices)

Step 2) then we need to take a switch (2960-24TT)

Step 3) Connect all the users to switch ^{through} Copper-straight-through.

Step 4) Now set IP Address of all the users.

Step 5) Use Ping Command to check the Connectivity.

Done.

Q2)

Problem statement → There are two organizations in a city named GEU and GEHU, Design a network b/w ~~over~~ the SOC department of GEHU and GEU. Also show the communication b/w user Number 1 of GEU and user number 2 of GEHU.

Objective - from the question I have understood that we have to connect 2 LAN's using Router.

Step 1) create LAN-1 with 4 PCs and create LAN2 with 4 PCs

Step 2) Connect both LAN with router and configure the Router.

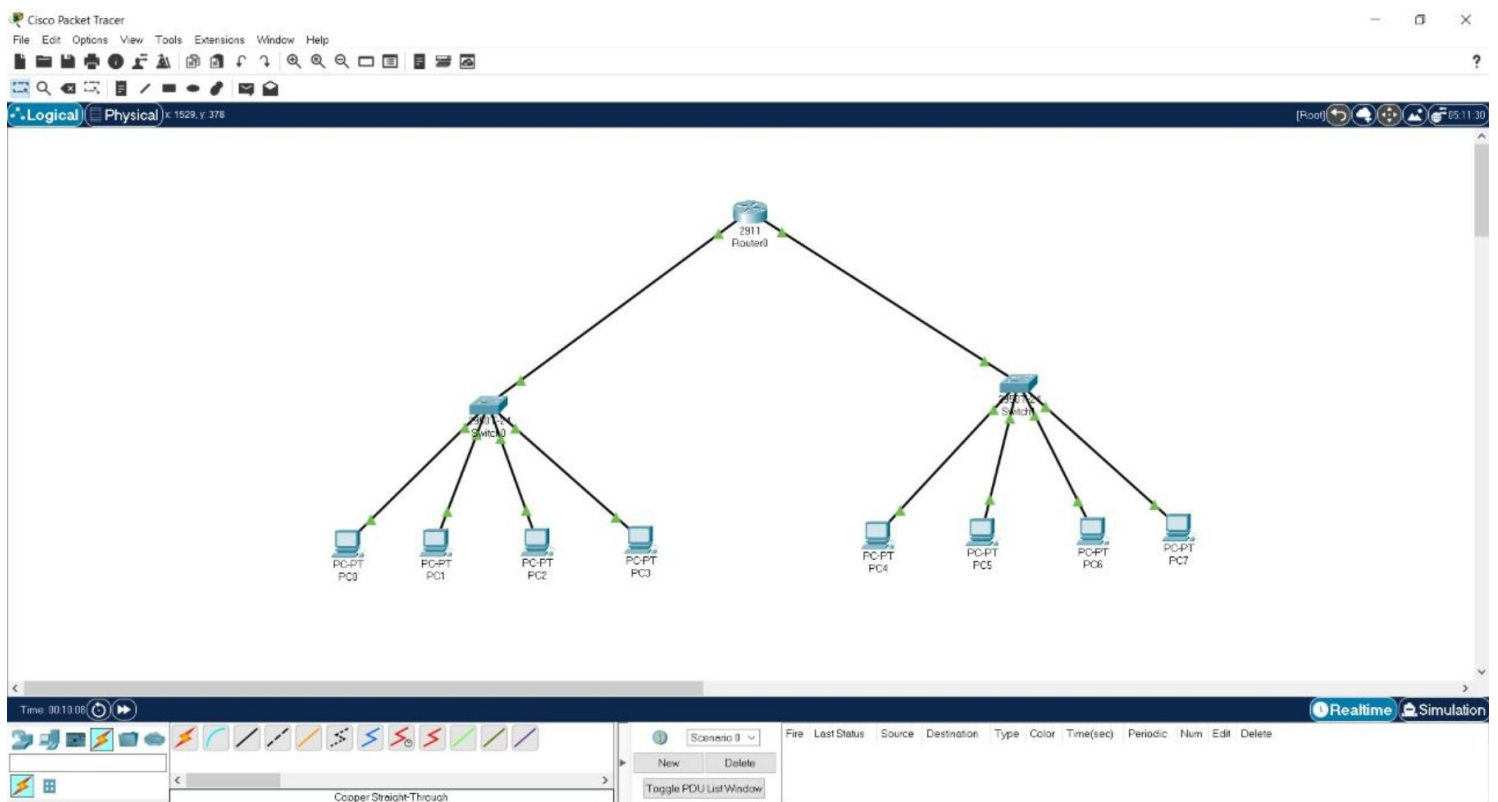

Step 3) Default Gateway for LAN-1 is 10.0.0.5

Default Gateway for LAN2 is

192.168.1.5

Step 4) sending PDU to see if connection is established.
