Ans1- Here we will use various steps for designing HR dept. with the 10 users & communicate like user number 1 and then number 5.

Step 1:- In this step we will take 10 PC's, the one switch & three ethernet wire.

Step 2: In this step we will give IP address of PC 0 & PC 4 device

Step 3- ~~The~~ create time ~~added~~ address Add Simple PDU from PC 0 to PC 4. It means we want to send data from PC 0 to PC 4.

Step 4- Now see in simulator mode and play, it will data transfer. Data travel from source to Destination.

Step 5- After reaching the destination, the destination will send acknowledgement to the source.

Ans2- Here we will take multiple steps to perform this.

Step 1- In this step we will take one router, few switches in which switch 1 contains CEH SOC department and CEHU of SOC department.

Step 2- Switch 1 (CEU of dept) has connected with three device PC0, PC1, PC2. & Switch 2 has also connected with 3 devices that is PC3, PC4, & PC5.

Step 3- We set the IP address of device (user number 1) CEU & device (user number 2) for 1.

Step 4- In real time, PDU(P) from PC0 to PC4 which refers we send data from PC0 to PC4.

Step 5- See in simulation & play, it will show data transfer. Data travel from source to destination.

Step 6- After reaching destination, the destination sent acknowledgment to the source.
